

BISCO® RS-840 Very Firm

BISCO® RS-840 Very Firm silicone sponge embodies the transition in the BISCO Silicone Cellular series from soft and conformable to firm and durable. It simultaneously retains the lightness of a foam while exhibiting the enhanced sealing capabilities of a traditional sponge rubber. Patented chemistry and cell structure provide long term performance advantage.

Features & Benefits, applicable to all BISCO® Cellular Materials

- Temperature independency
- UV/Ozone resistance
- Good compression set resistance

^{**}Specification- Applies to physical properties only, which are based on Rogers' internal benchmark and standard BISCO specification values. Specification values in **bold** are tested on a batch basis (applicable to thicknesses up to and including 12.7 mm (0.500 inches). Data provided upon request for other thicknesses). All other properties, flammability, thermal, etc, are based on industry standard quidelines.
